Case Study - Mt Barker BOB JANE - 15kW

For over 45 years **Bob Jane T-marts** have been providing Australian motorists with a total commitment to service. As an independent Australian business, Bob Jane T-marts has a national network of franchised and company owned tyre retail stores stocking an extensive range of tyres for passenger vehicles, 4WDs and light trucks.

Local franchise owner Andrew Bew from the Mt Barker branch has invested in a **15kW** solar system enabling him to counteract their ever increasing power bill.

With **60 X 250W** panels facing north on tilts, he will achieve the results needed to make his system a very worthwhile investment.

Andrew commissioned Class A Energy Solutions to install the **15kW**, saving his business **22,995kWh** per year in electricity consumption and additionally saving over **17 tonnes** of green house gas emissions.
