Case Study - Chris Milton ED - 20kW

Located in Prospect, South Australia, **Chris Milton Engine Developments** is your complete choice for high performance engines and engine development. Whether it be Circuit, Drag, Speedway, Street or Bike, **Chris Milton Engine Developments** have many years of experience in all. The company, being one of the largest and best equipped shops in Australia which can offer you a complete and personal service. They are a family run business in it's second generation and they take great pride in their name and in their product.

Like most businesses power costs are a concern and any savings that can be made whether is be solar or through the use of VSD's then businesses will investigate several different alternatives to see what works for them. In this case solar was the answer & being cash flow positive from day one this was a simple decision.

Chris Milton Engine Developments commissioned **Class A Energy Solutions** to install a **20kW** commercial solar system which will save them on average **30,660kWh** per year in electricity consumption. System comprised of **Schneider Conext** Inverters and **250W** premium panels.
