Case Study - Cleve Foodland - 30kW

Cleve is the Eastern Eyre Peninsula's largest business town, offering substantial shopping, health and community centre including educational, recreational and sporting facilities for the region. Hotel/motel, caravan park, service stations, RAA contractor, bakery, butcher, banks, accredited hospital with resident doctor, medical facilities and of course the Foodland supermarket.

Cleve Foodland/IGA has just installed a **30kW** commercial solar system to combat the ever increasing costs of power. Being cash flow positive from day one this was an easy decision making this a worthwhile investment.

Good to see Foodland stores take care of not only their local community but the greater environment as well.

With 6 cars off the road & 33 Tonnes of gas emissions removed from the environment can only be a good thing.
