Case Study - Comfort Inn Victor -15kW

As South Australia continues to be one of the best locations to install a solar PV system, with shorter payback periods and offering the best returns on investment, **The Comfort Inn Victor Harbor** was keen to take advantage of the beautiful sunshine Victor Harbor offers year round and commissioned **Class A Energy Solutions** to design and install a **15kW** solar system to help combat their mounting power bills and help future proof them from rising energy costs.

The expert team at **Class A Energy Solutions** proposed and installed 60 north facing 250w panels, resulting in saving the Comfort Inn **22,995kWh** per year in electricity consumption. The solar array system is a proven worthwhile venture with a return on investment under three years. **Comfort Inn Victor Harbor** had no hesitation in completing this project with Class A Energy Solutions that has resulted in a cash flow positive result from day one.
