## Case Study - HB Group Concrete -100kW

As a leading producer of construction materials in the Northern Territory, Sustainability is important to **The HB Group**. It made sense then, when choosing a company to assist them in achieving their power reduction goals, to select **Class A Energy Solutions**, a leader in Energy solutions Australia wide. Class A Energy Solutions prides itself on using only superior products in all their installations.

Through initiatives and Practices in Sustainability, Water Efficiency, Waste Management and Energy Conservation, The HBGroup aims to achieve **ISO 14001** Environmental Management System (**EMS**) accreditation as well as reducing carbon emissions and their environmental footprint. **Class A Energy Solutions** expert team analyzed their power consumption and energy needs and tailored a **100kWh** system, which at full capacity, will save them **160,600kWh** per year in electricity. A proven worthwhile investment with great environmental results.
